

ClearPix Emergency Notification System

EXCLUSIVE

The ClearPix Emergency Notification System (ENS) provides a valuable communication link to law enforcement and first responders. Using existing two-way radio networks, the ClearPix ENS shortens critical response times with its ability to alert first responders directly.

With a 10,000 zone capacity, users can configure the system to meet their specific needs while providing unique alarm messages for each zone. Alerts can be triggered by wired or wireless panic buttons, motion detectors, contact sensors, and other inputs.

The ClearPix ENS can be integrated with access control, intrusion detection, intercom, and other building systems to provide a comprehensive safety solution.

Contact us to schedule a demonstration of this important addition to your safety plan. We look forward to hearing from you.

- 10,000 zone capacity
- Unique alarm messages per zone
- Transmits e-mail, text, calls
- Transmit up to four frequencies
- Alarm messages can repeat
- Geo-location module available
- Virtual panic buttons
- Standard wireless sensors
- Scheduled notifications
- Printable alarm reports
- Public address announcements
- Integrate with card access
- Record message on unit
- Battery back up
